

ASSET MANAGEMENT BY DEKA

# Tailor-made investing

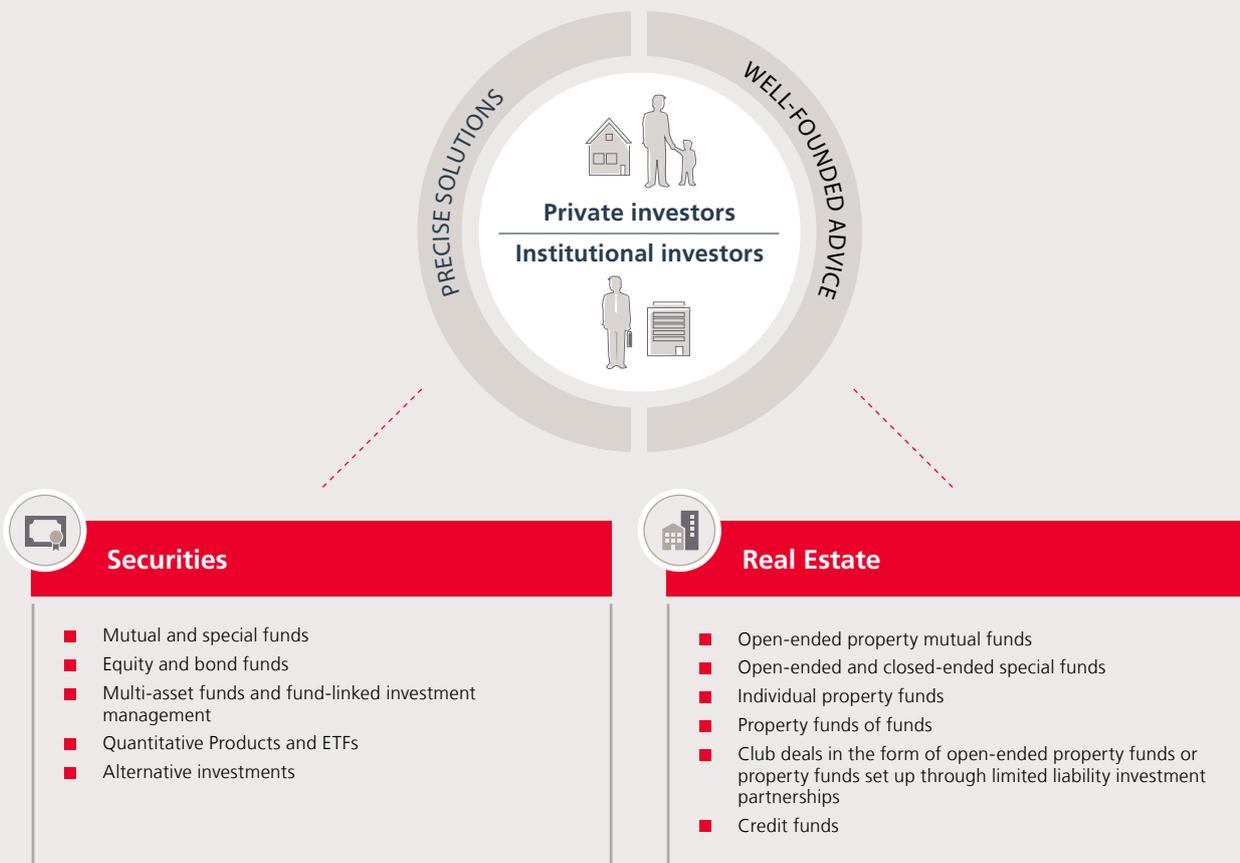

Persistently low interest rates have increased demand among investors for alternative types of investment. Deka's asset management offers a wide range of products for securities and property investing, with which savings bank customers and institutional customers alike can follow their investment strategies – with the right combination of opportunity and stability for each client. The foundation is provided by our comprehensive market expertise built on Deka Research, as well as our understanding of the requirements of the different customer groups.

Deka offers actively managed funds and investment products for securities and property, as well as exchange-traded funds (ETFs) for passive investing. As a result, investors can always find the right solution for their needs. What all of these solutions share is the high quality in

securities investment that is the hallmark of Deka and the savings banks. The best proof of this is offered by the excellent positions of Deka funds and investment solutions in well-known quality rankings, and the high scores achieved for management quality. At the 2019 Euro FundAwards, Deka once again demonstrated that it has a broad range of attractive and successful funds: 16 of the Deka Group's funds and four of its ETFs won a total of 40 awards. In the selection of "Fund Manager of the Year", Deka was ranked in second place; this was another major success after the previous year saw the Bank secure the top spot for the first time. In the 2019 Capital-Fonds-Kompass awards, Deka was awarded five stars for the seventh year in succession, once again placing it among the leading performers.

**Deka Asset Management – for quality in investing**

## Investment competence in all major asset classes under one roof

## Excellent investment solutions for securities and property

The fundamental or quantitative active management of securities funds is Deka's core competence in the field of securities investment. Investment strategies and investment vehicles can be precisely tailored to the risk appetite and target returns of each private or institutional investor. Deka's quality- and stability-oriented approach, our wide range of securities- and property-based investment products and our services always meet the investing needs of both types of customer.

The potential of property investments to generate continuous and stable long-term growth is especially interesting to investors in times of low interest rates. Physical assets and a history of mostly low volatility in yields make property an attractive asset class for private investors and institutional customers alike. Institutional investors can also make use of the range of credit funds.

Investments available to private and institutional customers also include passive index funds (ETFs) and pension products, as well as alternative investments.

### CURRENT AWARDS

## Making sustainability investable

Sustainable strategies for investment are growing in importance. Investors increasingly want ESG (environment, social & governance) factors to be considered in their investment decisions. This is where Deka's sustainability funds for private investors come in. The *Deka-Nachhaltigkeit* (Deka Sustainability) family of funds for private investors currently comprises three funds, namely an equity fund, a bond fund and a mixed asset fund which combines the two (*Nachhaltigkeit Balance*). Other distinctive offerings such as the *Deka-Umwelt-Invest* equity

fund, which invests solely in companies in the climate and environmental protection, water and renewable energy sectors, complete the range.

As part of its offering for institutional investors, Deka has developed funds and other investment solutions that are precisely tailored to the needs of investors with specific ethical requirements such as charitable foundations or churches.
