

DEKA'S BANKING BUSINESS

Meeting requirements – Assuring returns

The different sections of Deka's banking business provide savings banks, institutional customers and investment funds in asset management business with efficient access to the capital markets and finance. Based on the specific requirements of the individual customer, they offer a broad portfolio of products for the planning, control and administration of securities investments and balance sheet management. Banking and asset management are thus both essential parts of Deka's integrated business model.

tutional customers to make use of synergies and economies of scale – and to exploit opportunities while ensuring regulatory compliance. Whether the challenge involves the balanced management of liquidity risk, market conformity and liquidity tests, or equity exposures for insurance companies under Solvency II, our combination of capital markets expertise, innovation and customer understanding ensures that institutional customers achieve their objectives in the best way possible.

The customer-centred approach to banking is grounded in the seamless integration of investment solutions with infrastructure and advisory services. This enables insti-
