¹⁾ Prior-year figures have been adjusted (see note [43] *Income taxes*).

The statement of cash flows shows the change in the Deka Group's cash balance during the financial year. The item cash and cash equivalents corresponds to the balance sheet item cash reserves (see note [44]).

Cash flow from operating activities was determined using the indirect method. In other words, the total of profit or loss was adjusted to eliminate non-cash items such as measurement results and additions to provisions. The item other adjustments mainly includes the reclassification of interest and dividends received as cash and interest and income tax payments made during the financial year which have to be reported separately in accordance with IAS 7.

Cash flow from investing activities shows the proceeds and disbursements relating to items whose purpose relates in principle to long-term investment or use.

Financing activities include equity as well as cash flows from atypical silent capital contributions and from subordinated capital. The table below provides an overview of movements in financing liabilities.
